- Reading
- Learning

Projects

Iron Bank

Scrum Knight | Platform One | January 2022 to Present

- Team Size: 6 teams of varying sizes (60 people in total)
- Platform One's authorized, hardened, and approved container repository that supports the end-to-end lifecycle needed for modern software development
- Run meetings and agile ceremonies, provide support and help remove blockers, ensure the task boards are organized and reflect the current work in progress, adapt to feedback from the team to ensure the development process works for them, advocate for the developers
- Thoroughly document meetings and major decisions, organize internal documentation, and maintain consistent and transparent communication with the team

Space Cockpit

UX Researcher | Saber Astronautics | August 2020 to January 2022

- Team Size: 4 to 10
- Space Domain Awareness (SDA) visualization application developed in Unity3D
- An application designed for United States Air Force Airmen and Space Force Guardians to view and analyze their assets in the space environment with a focus on short training time and ease-of-understanding for Guardians with minimal to no aerospace knowledge
- Conducted user research to identify pain points in end users' current workflows and possible improvements, designed new features and improvements, programmed new features, bug and quality assurance testing, reviewed and approved new feature additions and changes to the application design and construction
- Liaised with primary customers and stakeholders to provide updates on the application's progress and future plans, led application demonstrations for higher-up military personnel including several 3-star Air Force and Space Force Generals
- Deployed and used on multiple secured military networks

Eira: Echoes of Adventure

Level Designer | No Scope Studios | January 2020 to May 2020

- Team Size: 22
- Casual adventure game with spatial puzzles developed in Unity3D
- Play as Eira, a young member of an intergalactic treasure-hunting clan, and trace their lost grandfather's footsteps on a journey through an icy world filled with curious alien wildlife, spatial puzzles, and hoards of treasure
- Designed and implemented the tutorial, polished level 1, created the vault
- Released on Steam May 2020
